

## Solution Code For Secondary Consumer

when I start as a clone

go to random position

point in direction pick random 1 to 360

forever

move 3 steps

if on edge, bounce

This makes the foxes walk around the screen!

when I start as a clone

show

forever

if touching color ? and Number of Secondary Consumers < 8 then

wait 1 seconds

change Number of Secondary Consumers by 1

create clone of myself

This causes the foxes to reproduce! Make sure to make the color match the color of your secondary consumer.

This also limits the number of secondary consumers. Remove to take off this limit or change the number to adjust it.
